

Grooved

Melt Blown Sediment Cartridge

Applications:

- Potable Water
- Beverage
- RO Pre-filtration
- Fine Chemicals
- Metal Finishing
- Plating solutions

Packaging:

Standard, 9-7/8 long X 2.5 OD.
50 per case, 21"-13"-13", 18 pounds

Big Blue, 9-3/4 long X 4.5 OD.
24 per case, 19" X 28" X 10", 28 pounds

Multi-layered graded density grooved polypropylene filter is ideally suited for removal of sand, silt, dirt and rust particles. Materials meet F.D.A. Specification and are specially constructed to preclude downstream contamination. Grooving effectively doubles the surface area providing lower clean pressure drop, increased dirt holding capacity and longer life. All these qualities resulting in a lower cost of ownership.

Available in 1, 5, 10, 25 and 50 microns nominal, in both standard 2.5 and Big Blue 4.5 inch outside diameters.
